

Accurate Results for Patient Care Workshop 2019

[Registrations open!](#)

Dear Colleagues,

The JCTLM Members' and Stakeholders' meeting will be held at the BIPM near Paris, France on 2 and 3 December 2019, and registration for the meeting is now open.

The JCTLM biennial meeting takes the form of a workshop that looks at a wide range of global initiatives to reduce between-method variability as a means to support improved clinical outcomes and patient safety. Interaction between the speakers and the audience will be a feature.

The first day of the programme focuses on **Challenges and opportunities** with lectures on Challenging the status quo and reports on New concepts to improving quality in laboratory medicine; International standards and regulation of IVDs; Meeting the challenges in harmonisation of method in haematology or biological standardization for infectious diseases.

The theme of the second day of the programme is **Getting the right answer** with consideration of Commutability, harmonization of methods for difficult analytes and looking at international projects for harmonization /standardization.

The workshop is open to all individuals and groups with an interest in traceability and method standardization/harmonization. These include laboratory medicine specialists, EQA providers, IVD manufacturers and national metrology institutes. Participants are encouraged to display posters of their work to share with peers and experts. The registration fee is just € 75 to cover catering and administration with the option to attend a dinner (at extra cost) during the evening of Day 1.

Details of the programme and on-line registration can be found at:

<http://www.bipm.org/en/committees/jc/jctlm/workshop-2019.html>

The template for poster submissions may be found from the same link.

JCTLM looks forward to welcoming you to the workshop.

For any questions please do not hesitate to contact the JCTLM Secretariat (jctlm@bipm.org).
